Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2008 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://cedb.asce.org/*.

Analytical techniques
Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Armor units
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Backfills
Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Basins
Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Beach erosion
Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Beach nourishment
Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Beaches
Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Long-Term Equilibrium Beach Profile Based on Maximum Information Entropy Concept — Ping Dong; 134 (3), 160-5 (2008).

Surf Similarity and Solitary Wave Runup — David R. Fuhrman and Per A. Madsen; 134 (3), 195-8 (2008).

Berms
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Boundaries
Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Boussinesq equations
Wave Equations for Regular and Irregular Water Wave Propagation — Bin Li; 134 (2), 121-42 (2008).

Breaking waves
Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Breakwaters
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Coastal engineering
Nonlinear Shallow Water Equation Modeling for Coastal Engineering — Maurizio Brocchini and Nicholas Dodd; 134 (2), 104-20 (2008).

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Coastal management
Long-Term Equilibrium Beach Profile Based on Maximum Information Entropy Concept — Ping Dong; 134 (3), 160-5 (2008).

Coastal morphology
Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Coastal processes
Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Coastal structures
Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Cohesionless sediment
Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Computation
Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Computational fluid dynamics technique
Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Computer aided simulation
Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Coupling
Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Cylinders
Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Dam construction
Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Dam failure
Modeling Dam Break Behavior over a Wet Bed by

a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

Damage assessment
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Data processing
Extracting Long Waves from Tide-Gauge Records — D. G. Goring; 134 (5), 306-12 (2008).

Deformation
Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Delaware
Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Dredging
Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Drift
Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

Earth pressure
Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Earthquakes
Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Empirical equations
Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Environmental issues
Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Equilibrium
Long-Term Equilibrium Beach Profile Based on Maximum Information Entropy Concept — Ping Dong; 134 (3), 160-5 (2008).

Estuaries
Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Fluid dynamics
Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Fluid flow
Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

Forecasting
Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Free surfaces
Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Harbors
Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Human factors
Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Hurricanes
Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Hydraulics
Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Hydrodynamics
Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Internal waves
PIV Techniques for Velocity Fields of Internal Waves over a Slowly Varying Bottom Topography — Motohiko Umeyama; 134 (5), 286-98 (2008).

Jetties
Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Laboratory tests
Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

Landslides
Analytical Modeling of Landslide-Generated Waves — Marcello Di Risio and Paolo Sammarco; 134 (1), 53-60 (2008).

Long waves
Extracting Long Waves from Tide-Gauge Records — D. G. Goring; 134 (5), 306-12 (2008).

Mathematical models
Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Measurement
Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Mining
Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Model studies
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Model tests
Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Monitoring
Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and

Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Nearshore

Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Nonlinear Shallow Water Equation Modeling for Coastal Engineering — Maurizio Brocchini and Nicholas Dodd; 134 (2), 104-20 (2008).

Neural networks

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Numerical models

Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Wave Equations for Regular and Irregular Water Wave Propagation — Bin Li; 134 (2), 121-42 (2008).

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

Ocean waves

Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Overland flow

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Parameters

Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Porosity

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Portugal

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Probability

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Random waves

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Regional analysis

Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Retaining walls

Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Return flow

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

Revetments

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Rip currents

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

River basins

Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Sand

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Scour

Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Sediment

Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Sediment deposits

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Sediment load

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Sediment transport

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Seismic effects

Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Shallow water

Nonlinear Shallow Water Equation Modeling for Coastal Engineering — Maurizio Brocchini and Nicholas Dodd; 134 (2), 104-20 (2008).

Ships

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Shoaling

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Shoreline changes

Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Simulation

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Wave Simulation in the Outer Río de la Plata Estu-

ary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Simulation models

Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Slopes

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Surf Similarity and Solitary Wave Runup — David R. Fuhrman and Per A. Madsen; 134 (3), 195-8 (2008).

PIV Techniques for Velocity Fields of Internal Waves over a Slowly Varying Bottom Topography — Motohiko Umeyama; 134 (5), 286-98 (2008).

Spain

Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Storm surges

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Subsidence

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Surf zone

Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Surf Similarity and Solitary Wave Runup — David R. Fuhrman and Per A. Madsen; 134 (3), 195-8 (2008).

Surface waves

Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Surveys

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Texas

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Tidal currents

Extracting Long Waves from Tide-Gauge Records — D. G. Goring; 134 (5), 306-12 (2008).

Topography

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

PIV Techniques for Velocity Fields of Internal Waves over a Slowly Varying Bottom Topography — Motohiko Umeyama; 134 (5), 286-98 (2008).

Transient flow

Analytical Modeling of Landslide-Generated Waves — Marcello Di Risio and Paolo Sammarco; 134 (1), 53-60 (2008).

Tsunamis

Analytical Modeling of Landslide-Generated Waves — Marcello Di Risio and Paolo Sammarco; 134 (1), 53-60 (2008).

Extracting Long Waves from Tide-Gauge Records — D. G. Goring; 134 (5), 306-12 (2008).

Turbulence

Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Two-dimensional models

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Undertow

PIV Techniques for Velocity Fields of Internal Waves over a Slowly Varying Bottom Topography — Motohiko Umeyama; 134 (5), 286-98 (2008).

Velocity

Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Wave Equations for Regular and Irregular Water Wave Propagation — Bin Li; 134 (2), 121-42 (2008).

PIV Techniques for Velocity Fields of Internal Waves over a Slowly Varying Bottom Topography — Motohiko Umeyama; 134 (5), 286-98 (2008).

Water circulation

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

Water depth

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Water quality

Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Water waves

Analytical Modeling of Landslide-Generated Waves — Marcello Di Risio and Paolo Sammarco; 134 (1), 53-60 (2008).

Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

Waterfront structures

Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Watersheds

Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Waterways

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Wave action

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Wave forces

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Wave generation

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Wave height

Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Wave measurement

Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Wave propagation

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Wave Equations for Regular and Irregular Water Wave Propagation — Bin Li; 134 (2), 121-42 (2008).

Wave reflection

Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Wave runup

Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Surf Similarity and Solitary Wave Runup — David R. Fuhrman and Per A. Madsen; 134 (3), 195-8 (2008).

Wave spectra

Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Waves

Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Author Index

Ahmad, Syed Mohd
Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Bacopoulos, Peter
Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Barua, Dilip K.
Discussion of "Maximum Fluid Forces in the Tsunami Runup Zone" by Harry Yeh — Dilip K. Barua; 134 (3), 199-200 (2008).

Brocchini, Maurizio
Nonlinear Shallow Water Equation Modeling for Coastal Engineering — Maurizio Brocchini and Nicholas Dodd; 134 (2), 104-20 (2008).

Brubaker, John M.
Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Cáceres, Iván
Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Cambazoğlu, M. Kemal
Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Campos, M. I.
Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Cataño-Lopera, Yovanni A.
Closure to "Burial of Short Cylinders Induced by Scour under Combined Waves and Currents" by Yovanni A. Cataño-Lopera and Marcelo H. García — Yovanni A. Cataño-Lopera and Marcelo H. García; 134 (4), 262-4 (2008).

Chandramohan, V. R.
Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Chopakatla, Sreenivasa C.
Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Choudhury, Deepankar
Stability of Waterfront Retaining Wall Subjected to Pseudodynamic Earthquake Forces — Deepankar Choudhury and Syed Mohd Ahmad; 134 (4), 252-60 (2008).

Crespo, A. J. C.
Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

Dalrymple, R. A.
Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

de los Santos, Francisco J.
Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Demirbilek, Zeki
Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Book Reviews — Zeki Demirbilek; 134 (1), 66-7 (2008).

Dhinakaran, Govindasamy
Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Di Risio, M.
Analytical Modeling of Landslide-Generated Waves — Marcello Di Risio and Paolo Sammarco; 134 (1), 53-60 (2008).

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Dodd, Nicholas
Nonlinear Shallow Water Equation Modeling for Coastal Engineering — Maurizio Brocchini and Nicholas Dodd; 134 (2), 104-20 (2008).

Dong, Ping
Long-Term Equilibrium Beach Profile Based on Maximum Information Entropy Concept — Ping Dong; 134 (3), 160-5 (2008).

Dragani, W. C.
Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Espino, Manuel
Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Figlus, Jens
Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Friedrichs, Carl T.
Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Fuhrman, David R.
Surf Similarity and Solitary Wave Runup — David R. Fuhrman and Per A. Madsen; 134 (3), 195-8 (2008).

Funakoshi, Yuji
Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Garavento, E.
Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

García, Marcelo H.
Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Closure to "Burial of Short Cylinders Induced by Scour under Combined Waves and Currents" by Yovanni A. Cataño-Lopera and Marcelo H. García — Yovanni A. Cataño-Lopera and Marcelo H. García; 134 (4), 262-4 (2008).

Gómez-Gesteira, M.
Modeling Dam Break Behavior over a Wet Bed by a SPH Technique — A. J. C. Crespo, M. Gómez-Gesteira, and R. A. Dalrymple; 134 (6), 313-20 (2008).

González-Marco, Daniel
Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Goring, D. G.
Extracting Long Waves from Tide-Gauge Records — D. G. Goring; 134 (5), 306-12 (2008).

Graw, Kai Uwe
Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Grifoll, Manel
Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and

Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Haas, Kevin A.

Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

Hagen, Scott C.

Coupling of Hydrodynamic and Wave Models: Case Study for Hurricane Floyd (1999) Hindcast — Yuji Funakoshi, Scott C. Hagen, and Peter Bacopoulos; 134 (6), 321-35 (2008).

Haller, Merrick C.

Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Hu, Keming

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Hur, Dong-Soo

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Karasu, Servet

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Kearney, Peter G.

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Kennedy, Andrew B.

Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).

Kobayashi, Nobuhisa

Time-Averaged Probabilistic Model for Irregular Wave Runup on Permeable Slopes — Nobuhisa Kobayashi, Francisco J. de los Santos, and Peter G. Kearney; 134 (2), 88-96 (2008).

Inverse Estimation of Sand Transport Rates on Nourished Delaware Beaches — Jens Figlus and Nobuhisa Kobayashi; 134 (4), 218-25 (2008).

Li, Bin

Wave Equations for Regular and Irregular Water Wave Propagation — Bin Li; 134 (2), 121-42 (2008).

Lippmann, Thomas C.

Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Liu, P. L.-F.

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Liu, Xiaofeng

Three-Dimensional Numerical Model with Free Water Surface and Mesh Deformation for Local Sediment Scour — Xiaofeng Liu and Marcelo H. García; 134 (4), 203-17 (2008).

Losada, Inigo J.

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Madsen, Per A.

Surf Similarity and Solitary Wave Runup — David R. Fuhrman and Per A. Madsen; 134 (3), 195-8 (2008).

Martin, P.

Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Medina, Josep R.

Discussion of "Burial of Short Cylinders Induced by Scour under Combined Waves and Currents" by Yovanni A. Cataño-Lopera and Marcelo H. García — Josep R. Medina; 134 (4), 261-2 (2008).

Michalsen, David R.

Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Mizutani, Norimi

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Murali, K.

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Nakamura, Tomoaki

Mechanism of Backfilling Sand Discharge from a Gap under Vertical Revetment — Tomoaki Nakamura, Dong-Soo Hur, and Norimi Mizutani; 134 (3), 178-86 (2008).

Neelamani, S.

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Neves, Maria Graça

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Nuñez, M. N.

Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Panchang, Vijay

Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Panizzo, A.

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Rao, Balakrishna K.

Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Rao, Subba

Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R. Chandramohan; 134 (2), 81-7 (2008).

Ravens, Thomas M.

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Reeve, D. E.

Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Reis, Maria Teresa

Wave Overtopping of Póvoa de Varzim Breakwater: Physical and Numerical Simulations — Maria Graça Neves, Maria Teresa Reis, Inigo J. Losada, and Keming Hu; 134 (4), 226-36 (2008).

Richardson, John E.

Field Verification of a Computational Fluid Dynamics Model for Wave Transformation and Breaking in the Surf Zone — Sreenivasa C. Chopakatla, Thomas C. Lippmann, and John E. Richardson; 134 (2), 71-80 (2008).

Sammarco, Paolo

Analytical Modeling of Landslide-Generated Waves — Marcello Di Risio and Paolo Sammarco; 134 (1), 53-60 (2008).

Sánchez-Arcilla, Agustín

Relevance of Different Driving Terms in the Barcelona Harbor Winter Circulation: Field Study and Numerical Model Performance — Iván Cáceres, Manel Grifoll, Daniel González-Marco, Agustín Sánchez-Arcilla, and Manuel Espino; 134 (5), 275-85 (2008).

Sapp, Brian K.

Video Measurements of Large-Scale Flows in a Laboratory Wave Basin — Kevin A. Haas, Andrew B. Kennedy, and Brian K. Sapp; 134 (1), 12-20 (2008).

Siegel, Eric M.

Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Simionato, C. G.

Wave Simulation in the Outer Río de la Plata Estuary: Evaluation of SWAN Model — W. C. Dragani, E. Garavento, C. G. Simionato, M. N. Nuñez, P. Martin, and M. I. Campos; 134 (5), 299-305 (2008).

Subrahmanya, K.

Stability Aspects of Nonreshaped Berm Breakwaters with Reduced Armor Weight — Subba Rao, K. Subrahmanya, Balakrishna K. Rao, and V. R.

Chandramohan; 134 (2), 81-7 (2008).

Suh, Kyung Duck

Wave Reflection from Nearshore Depressions — David R. Michalsen, Merrick C. Haller, and Kyung Duck Suh; 134 (1), 1-11 (2008).

Sundar, Vallam

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Sundaravadivelu, Renganathan

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Hydrodynamic Characteristics of Seaside Perforated Semicircular Breakwaters due to Random Waves — Govindasamy Dhinakaran, Vallam Sundar, Renganathan Sundaravadivelu, and Kai Uwe Graw; 134 (4), 237-51 (2008).

Thomas, Robert C.

Ship Wave-Induced Sedimentation of a Tidal Creek in Galveston Bay — Thomas M. Ravens and Robert C. Thomas; 134 (1), 21-9 (2008).

Tsay, Ting-Kuei

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Umeyama, Motohiko

PIV Techniques for Velocity Fields of Internal Waves over a Slowly Varying Bottom Topography — Motohiko Umeyama; 134 (5), 286-98 (2008).

Vandever, Justin P.

Influence of Spectral Width on Wave Height Parameter Estimates in Coastal Environments — Justin P. Vandever, Eric M. Siegel, John M. Brubaker, and Carl T. Friedrichs; 134 (3), 187-94 (2008).

Vijayalakshmi, K.

Hydrodynamics of a Concentric Twin Perforated Circular Cylinder System — K. Vijayalakshmi, R. Sundaravadivelu, K. Murali, and S. Neelamani; 134 (3), 166-77 (2008).

Work, Paul A.

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Wu, Nan-Jing

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Yeh, Harry

Closure to "Maximum Fluid Forces in the Tsunami Runup Zone" by Harry Yeh — Harry Yeh; 134 (3), 200-1 (2008).

Yim, S. C.

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Young, D. L.

Computation of Nonlinear Free-Surface Flows by a Meshless Numerical Method — Nan-Jing Wu, Ting-Kuei Tsay, and D. L. Young; 134 (2), 97-103 (2008).

Yuhi, Masatoshi

Impact of Anthropogenic Modifications of a River Basin on Neighboring Coasts: Case Study — Masatoshi Yuhi; 134 (6), 336-44 (2008).

Yuk, D.

Numerical Simulations of Wave Generation by a Vertical Plunger Using RANS and SPH Models — S. C. Yim, D. Yuk, A. Panizzo, M. Di Risio, and P. L.-F. Liu; 134 (3), 143-59 (2008).

Yüksek, Ömer

Coupled Longshore and Cross-Shore Models for Beach Nourishment Evolution at Laboratory Scale — Servet Karasu, Paul A. Work, M. Kemal Cambazoğlu, and Ömer Yüksek; 134 (1), 30-9 (2008).

Zacharioudaki, A.

Semianalytical Solutions of Shoreline Response to Time-Varying Wave Conditions — A. Zacharioudaki and D. E. Reeve; 134 (5), 265-74 (2008).

Zhang, Jianfeng

Incorporating Rubble Mound Jetties in Elliptic Harbor Wave Models — Vijay Panchang, Jianfeng Zhang, and Zeki Demirbilek; 134 (1), 40-52 (2008).

Zhang, Yang

Rip Currents with Varying Gap Widths — Andrew B. Kennedy, Yang Zhang, and Kevin A. Haas; 134 (1), 61-5 (2008).
